

*Getting started with*

# **MULTI TERMINAL TABLE GAMES**

ROULETTE • BACCARAT

**CASINO CANBERRA**

# LET'S PLAY

*Multi Terminal Table Games are the newest and most exciting addition to our promise of offering you unforgettable gaming experiences. Because every Multi Terminal can connect in real time to any of the games being hosted by a Multi Terminal Dealer, there's no more waiting around for a spot at your favourite tables.*

*Getting started with Multi Terminal Gaming is easy. Like our traditional tables, games are hosted by a live Dealer. So before you choose a terminal, check which games are currently being run. At Casino Canberra, the Multi Terminals offer Roulette and Baccarat. Any or all of the games may be running simultaneously and the current game(s) on offer will be indicated above the Dealer area.*

## GETTING STARTED

- ◇ If you'd like to play one of the games, simply select an empty Player Terminal and insert the amount of money, using bank notes, that you'd like to begin with. This will establish your Player Chip Account and is how you buy-in to the games. Think of it like purchasing chips at a normal casino table.
- ◇ Once you've inserted cash into your Terminal, the value will be automatically credited to your Player Chip account.
- ◇ You can increase your account credits at any time by inserting extra money.

## PLAYING THE GAMES

Now that you've set up an active Player Chip Account, it's time to start playing.

For rules on specific games, take a look at our How To Play brochures, or click the Rule button on your screen.

**For a detailed overview of the Multi Terminal screen, see the illustration overleaf.**

- ◇ If there is more than one Multi Terminal game being run, choose which one you'd like to play by selecting it from the available games listed at the top right of your screen.
- ◇ Once you've chosen a game, you will be presented with a digital representation of the game and can place bets in the same way as at a traditional table. Select what value of chip you'd like to use and touch the table to place your bets directly. Multiple denominations of smaller chips will automatically be combined into larger chips when stacked together. e.g. Five \$1 chips will automatically turn into a \$5 chip when placed on the same section of the table.

***Note:** A Cancel button is available to remove any incorrectly placed chips.*

- ◇ While placing bets, your screen will clearly display a countdown of the time remaining before the next round of play.
- ◇ Once the Wagering Period is up, your Dealer will reveal the result of the previous spin, roll, or deal (depending on the game being played) and the result will be displayed on your screen. Winning bets will be payed directly into your available credits and losing bets will be removed from the table. A new round will then begin.

## FINISHING UP

- ◇ When you've finished playing, and as long as you have no bets currently active, select the Cash Out option to print off your credit receipt. This is redeemable at the Casino Canberra Cash Desk for cash or cash equivalent.

### *Example Multi Terminal*

- 1** *Select Table*  
Display the available games tables
- 2** *Back To Last Betting Table*  
Back to your previous table
- 3** *Cash Out*

Turn on or off background sounds and music

---

**GOOD LUCK  
AND HAPPY  
PLAYING!**

## *Ask any time*

Our friendly staff are always happy to answer your questions about any of the games we play. Once you get started, feel free to ask an available staff member if you need to know more.

The Dealer's role is to manage the game and assist you with any queries you might have, however they cannot advise you on what to do.
