# LET'S PLAY BACCARAT

*Long considered the most glitzy of casino table games, people often associate Baccarat with huge bets and even more complex rules. In reality, the version played at Casino Canberra is an extremely simple and fun game of luck. But it's still just as glitzy!*

*Mini Baccarat is played with 8 standard decks shuffled together. Numbered cards are worth their indicated value, Aces equal 1, and picture cards (King, Queen and Jack) count as zero.*

## THE GOAL

In Baccarat, you are betting whether the Banker or Player will have a hand worth closer to 9, or that the hand will be a tie. Just choose a side and see what happens!

## HOW TO PLAY

- ◇ To begin, simply place a bet on Banker, Player or Tie based on your predicted outcome. Banker and Player are just placeholder names for the hands. There is no actual 'player' who gets the cards.
- ◇ After placing your bets, two cards are dealt by the Dealer to each hand. The first and third card are the Player's, the second and fourth are the Banker's.
- ◇ The Dealer will read out the value of each hand, with only the right hand digit being counted.

- For example:

$$- 8 + 5 = 3$$

$$- \text{King (0)} + 6 = 6$$

- ◇ Based on the hands, any additional cards required are drawn by the Dealer according to the Table of Play (tableau) overleaf.

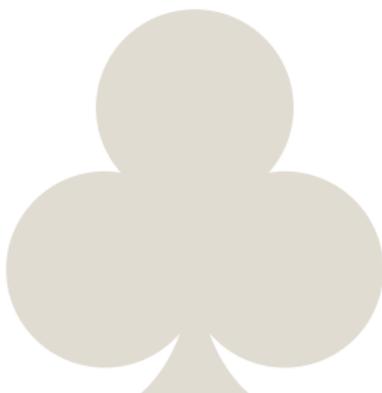

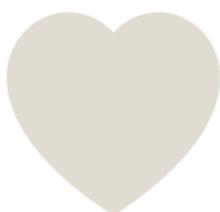

*It's not necessary to fully memorise the tableau in order to take part in the game, but it will help you to better understand what's going on.*

## WINNING

- ◇ If the hand you bet on finishes closer to 9, you win!
- ◇ Winning bets are paid even money, except where the Banker's hand wins with a total of 6. In this case, winning bets will be paid half.
- ◇ On our high limit tables, the casino retains a 5% commission on winning banker bets.
- ◇ Successful Tie bets are paid at 8 to 1.

### *Canberra Pairs*

- ◇ Canberra Pairs is an optional side bet that the first two cards of either the Banker or Player will be a pair. Winning bets are paid 11 to 1. All other combinations lose.

## Table of Play

**GOOD LUCK!**

## *Buying Chips*

Bets at the Casino are made with Casino chips. You can purchase these at any of the gaming tables. Simply place the amount you wish to play (notes only) on the table and the Dealer will pass you the equivalent in chips. Their value is clearly printed on each face. You can redeem your chips for cash at the Cashier's window at any time.

## *Ask any time*

Our friendly staff are always happy to answer your questions about any of the games we play. Once you get started, feel free to ask your Dealer if you need to know more.

The Dealer's role is to manage the game and assist you with any queries you might have, however they cannot advise you on what to do.
